

Corporate Responsibility

Our Company

With a 30-year history of working with NIH and developing innovative IT solutions, CTIS supports health informatics, technology solutions, clinical trials and research. CTIS is a leading partner to the National Cancer Institute's Cancer Therapy Evaluation Program, delivering clinical informatics and supporting its national network of academic centers. We are proud to collaborate with clinical trial doctors, teams, and programs testing hundreds of cancer therapies. Other CTIS customers within NIH include the National Heart, Lung and Blood Institute (NHLBI) and the National Institute of Allergy and Infectious Diseases (NIAID).

CTIS embraces a culture of wellness that extends from our collaborations with clinical customers, to our core values and internal culture, and the promises we keep to charitable health research organizations like Children's Inn. CTIS leans into the future of health information technology, research, and equity in healthcare. This work is never done, and we are committed to the journey and support of families and their loved ones.

Our Leadership

Bharti Shah is CEO of CTIS, Inc., a thriving women-owned small business (WOSB) in Rockville, Maryland. Founded by the late Raj Shah, CTIS was part of his vision to develop and implement complex health information technology systems that improve the quality of peoples' lives and their health. Through Bharti Shah's continued leadership, CTIS is passionately committed to NIH's mission of enhancing health, expanding research, and improving healthcare outcomes through cutting-edge technology. Bharti is also a long-time educator, a passionate advocate for children, and a loving mother and grandmother.

CTIS was awarded a major grant from the National Institute on Minority Health and Health Disparities to partner with their teams to understand social and environmental factors and gaps in health outcomes across communities.

CTIS supports the Children's Inn at NIH and other organizations that focus on equity, healthcare research, and protecting the most vulnerable in our communities.
